

IL SAN PIETRO DI POSITANO

MANAGEMENT COMMITMENT

ENVIRONMENTAL POLICY

Targets and Commitment

Top Management and Employees of San Pietro S.p.A. are committed to continually improve environmental performance, prevent pollution, comply with the environmental law, especially with the Italian Decreto Legislativo 121/2011 on administrative liability of Legal Entities for environmental crimes.

Since April 2002, Top Management of San Pietro S.p.A. have established, implemented, maintained and improved an Environmental Management System, in conformity with the International Standard ISO 14001.

Our Environmental Management System focuses on:

- evaluating and monitoring all aspects and impacts of our activities, products and services;
- establishing improvement programmes;
- training Employees and Suppliers in environmental aspects and related impacts associated with their work, and in observance of legal requirements;
- communicating about environmental aspects and Environmental Policy, particularly with Guests, Suppliers, Relais & Châteaux, Public Bodies and other interested parties.

We engage to attain these objectives and targets, by:

- periodic evaluation of aspects and impacts of our activities;
- identification, up-date and observance of the law;
- control, monitoring and measurement of consumption of water-supply, energy, industrial waste and other pollutants;
- use of ecological products and development of safe and energy-save processes;
- use of best-available techniques;
- reduction of the production of waste material, and observance of local rubbish disposal timetable (separate collection - "Positano sorts rubbish for recycling");
- preventive evaluation of potential aspects and impacts associated with new or modified activities, products and services;
- commitment of our Organization to prevent pollution, to comply with legal requirements and to continually improve.

Managing Tools

Top Management and Employees of San Pietro S.p.A. are committed to maintain and improve the Environmental Management System, by adopting best practices in:

- managing processes that could make adverse changes to the environment, and could infringe law;
- managing our Organization and establishing and implementing improvement programmes;
- managing internal and external communication about environmental aspects and impacts;
- managing education and experience of our Employees;
- establishing, implementing, maintaining and respecting procedures determined by the Organization to ensure control of processes that relate to environmental aspects;
- training our Employees in controlling significant environmental aspects;
- making aware our Employees of:
 - environmental objectives and targets and the extent to which objectives and targets have been met;
 - definition of roles, responsibilities and authorities;
 - observance of the law;
 - respect of our procedures;
 - control of suppliers and contractors;
- conducting of audits.

Specific Management Representative (“RGAS” Health Safety and Environment Manager)

Top Management has appointed a specific management representative, the “RGAS” HS&E Manager, who ensures that the Environmental Management System is established, implemented and maintained, focusing on the previous objectives and targets.

“RGAS” HS&E Manager has defined roles, responsibilities and authority to plan, implement and maintain the requirements of the environmental management system, described by our Environmental Manual and Procedures.
